SMART COMFORT FOR EVERY ROOM

The SAJA Series features an advanced inverter compressor engineered to deliver year-round comfort with high-efficiency performance of up to 22 SEER. Its optimized energy efficiency helps reduce utility costs while minimizing environmental impact—making it an ideal solution for energy-conscious homeowners.

Multi-zone systems provide added flexibility by allowing you to set different temperatures in each room—all while using a single outdoor compressor. Designed for installation by trained and certified HVAC professionals, the SAJA Series ensures proper setup, peak performance, and long-term reliability.
